App Setup

To set up your band with a mobile device, you must first download and install the APP from either the APP store or Google Play store or scan the following QR codes to download the APP.
Can also search "Endubro Fit" to download the APP.
Device compatibility: apple'device and android device with Bluetooth4.0
System compatibility：iOS8+（iPhone4s and above）, Android4.4+.

Connecting the APP

1. Turn on the Bluetooth on your mobile device (if it is not already on).
2. Open the APP on your mobile device.
a. If you are a new member, you will need to register a new account. Be sure to enter your personal information accurately in the given prompts.
b. If you are an existing member, you can just input your login email address and password.
3. After logging in, choose the option to start the pairing process.
4. Select the detected L38I# code. This should be the same code that shows up on your HR device's screen. (Note: The tracker must be near your mobile phone in order for it to detect it.)
5. A connection mark will be shown on your tracker.

CONNECTED When the tracker is connected successfully,both your tracker and mobile device will receive a notification.
If the connection is not successful, please repeat the same steps to try again.

Troubleshooting

App failed to pair with the band:
1. Check if your phone network and Bluetooth settings are turned on or not. Both the phone network and Bluetooth need to be on at the same time for data synchronization.
2.Check if your band is near your phone. The

connection distance is within 5 meters.
3.Make sure that the band is not connected to another account.
4.When pair with another Android, please unpair the band firstly in APK. When pair with another Iphone, please unpair the band firstly in APP, in the mean time, delete it in System Bluetooth.

App failed to synchronize data:
1.Check if your phone network and Bluetooth settings are turned on. Both the phone network and Bluetooth need to be on at the same time for data synchronization.
2.Check if your band is near your phone. The connection distance is within 5 meters.
3.Make sure that your band is connected with your phone and the app.
4.When fail to log in with old email address:
Please kindly know that, when you log in or sign up in different types of APP, pls use a new email address. One email address matches for one type of APP.

FAQ

Question: When connected with App, the data SYNC is finished but the bracelet time display is still incorrect.
Answer: Reset the bracelet and try data SYNC again.

Question: After the bracelet connected with APP,why the bracelet didn't show call ID when the call coming?
Answer:
-Android: After connected the bracelet with the APP, please allow "Endubro Fit" to visit calls, SMS, contacts and keep "Endubro Fit" running in background.If there is a security software on your phone, set the software "Zeroner Health Pro" as "trust".
-iOS: Please restart your phone and connect the bracelet again.

Question: The bracelet icon shows the bluetooth was connected, but the APP cannot SYNC data?
Answer: Generally it is caused by the bluetooth of the phone. Please switch off the APP first, restart the bluetooth and repair. If the step above doesn't work, please restart your phone and try again.
